

# CYBERSECURITY IN ACTION

Phishing Email Detection and Awareness Report

LEARN MORE →

OLADIMEJI PRECIOUS EMMANUEL  
01/25/2026

# Executive Summary

This report explains how phishing emails work and how users identify them. Two email samples were reviewed. One phishing and one safe. The goal is awareness and risk reduction.

# Phishing Email Analysis

## Email type

- Phishing

## Indicators found

- Spoofed sender domain
- Urgent language
- Suspicious link
- 

## Risk explanation

- If a user clicks the link and enters login details, attackers can steal accounts or data.
- 

## Classification

- Phishing
-

# Phishing Email Analysis

## Type

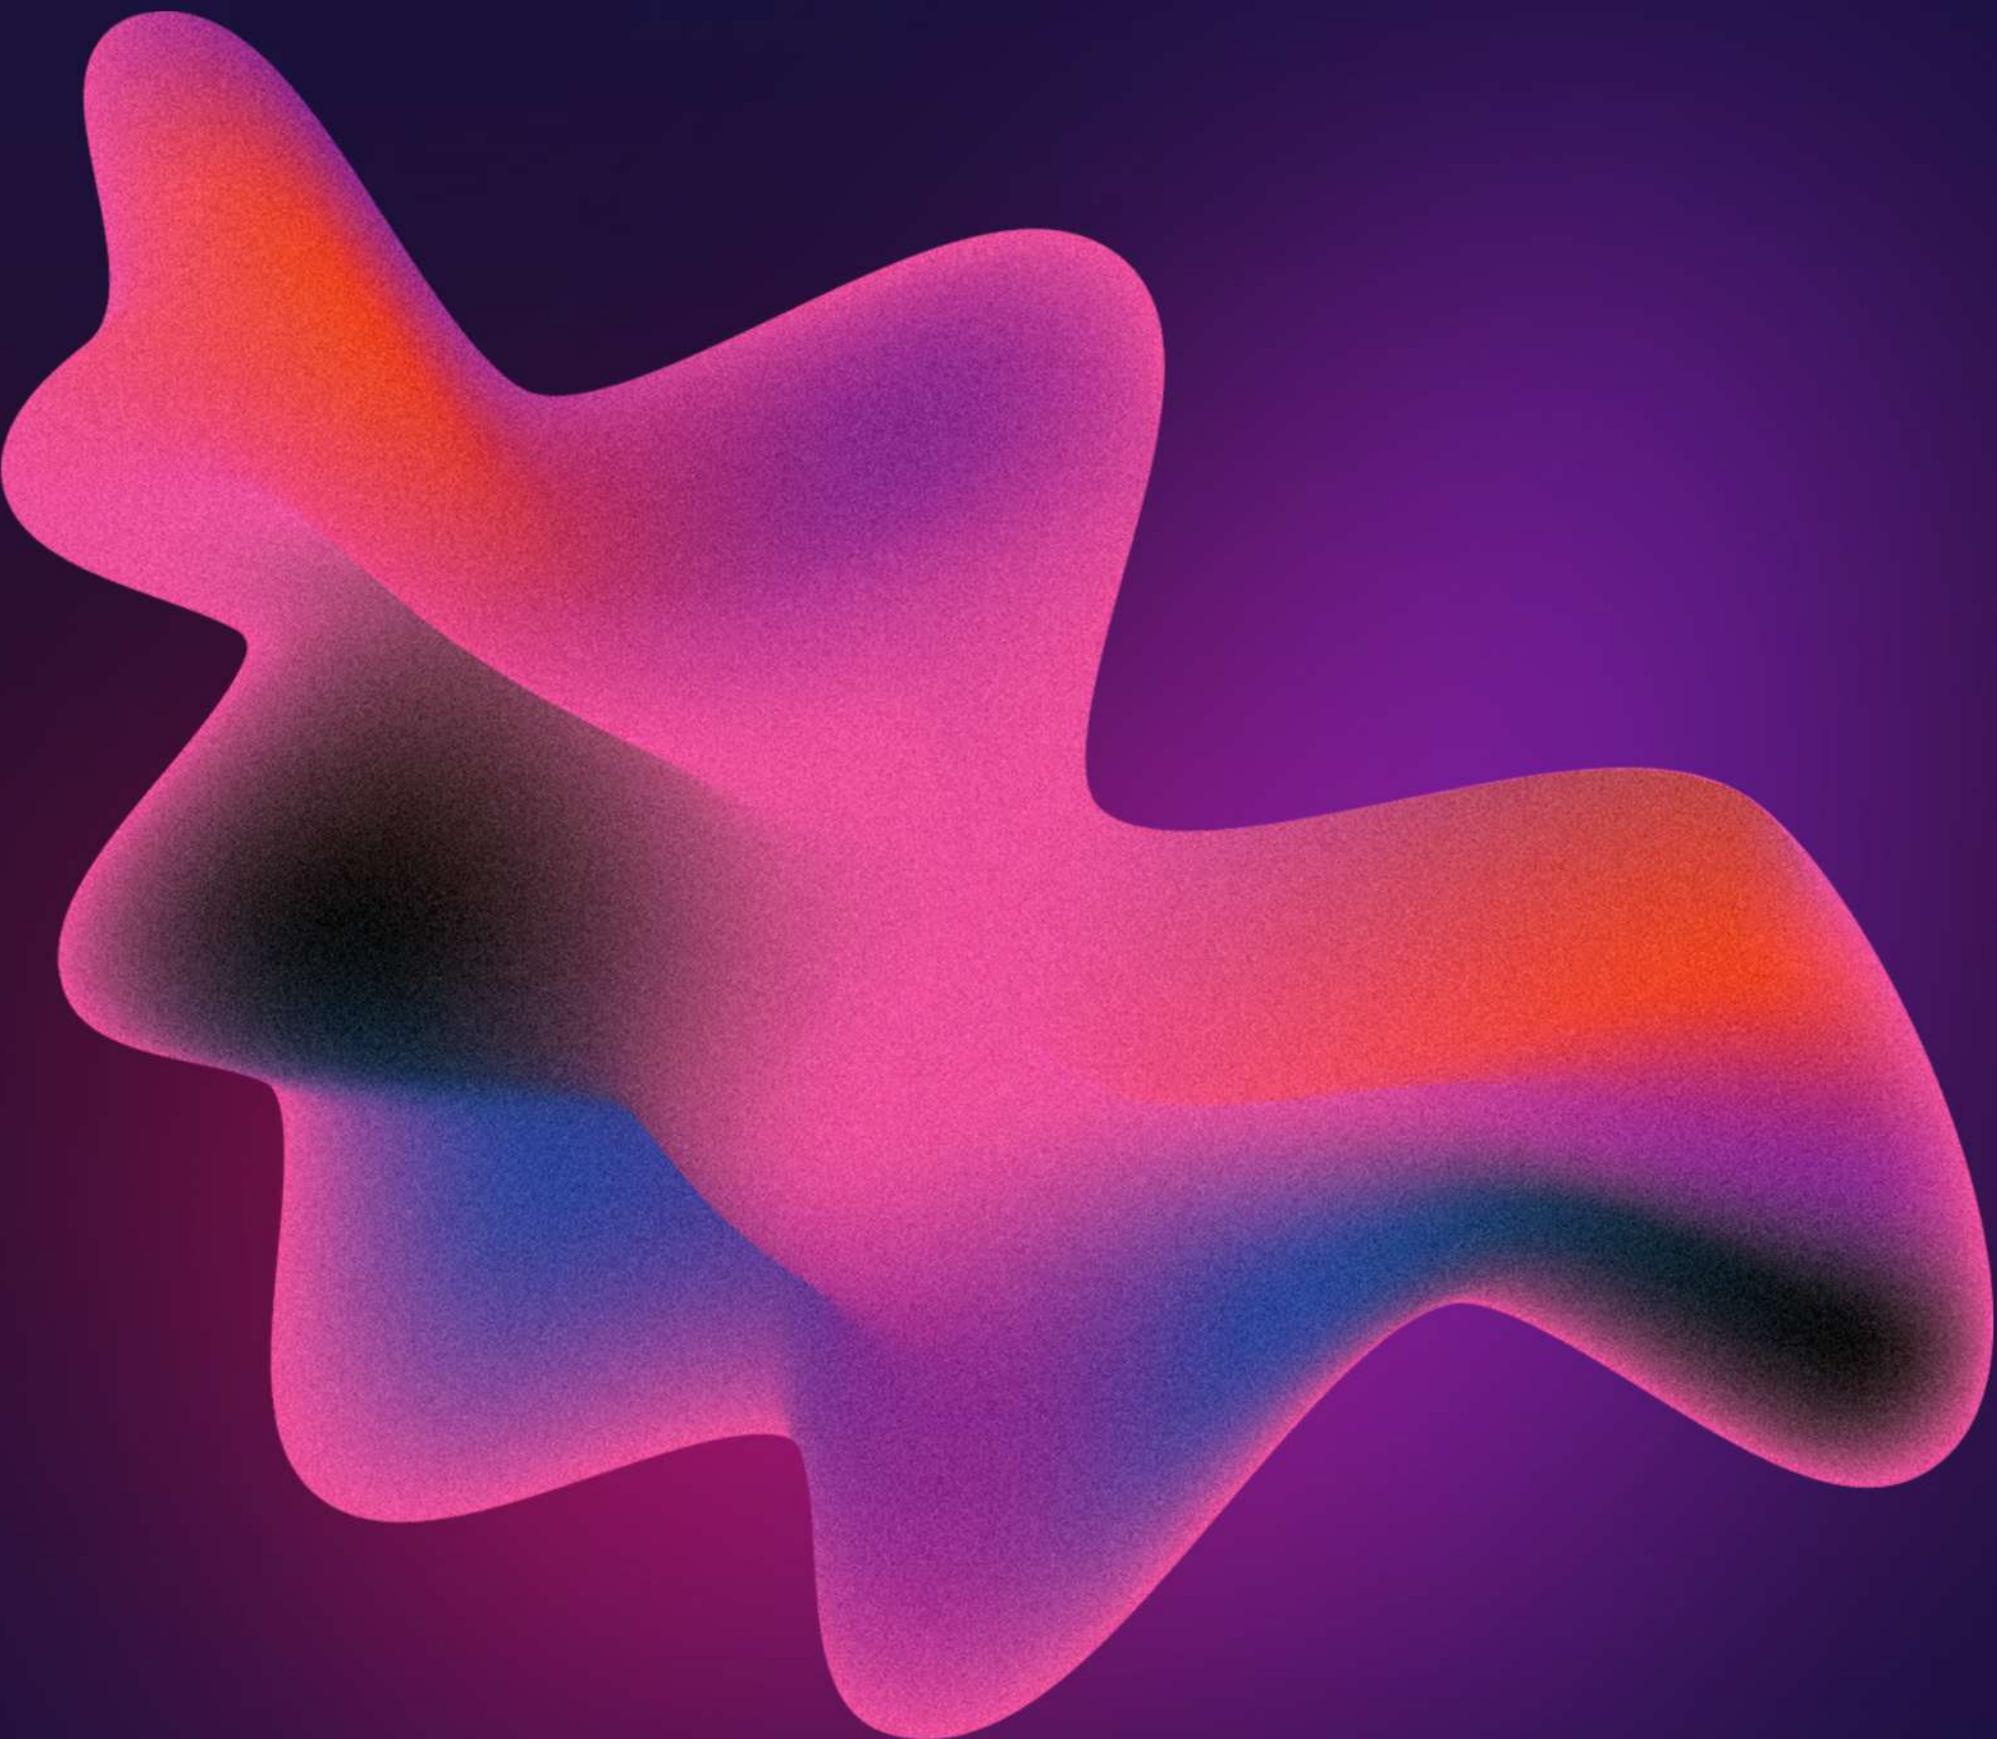

Phishing

## Indicators

- Spoofed sender domain
- Urgent language
- Suspicious link

## Risk

Credentials theft and account compromise.

# Safe Email Analysis

## Type

- Safe

## Indicators

- Sender domain matches service
- No urgency
- Official website link

# Detection Checklist

- Check sender domain
- Watch urgency and threats
- Inspect links
- Avoid credential requests
- Be careful with attachments

# Conclusion

Phishing relies on user trust.  
Simple checks greatly  
reduce risk. Regular  
awareness training  
improves security posture.
